GENDER BASED VIOLENCE AS OUR WORLD PROBLEM

Good day,

The world problem that I have chosen is gender-based violence. Gender-based violence is a global issue that is affecting millions, causing inequality and human rights abuse. We must create a culture of respect and understanding where everyone must feel safe and valued; people need to learn how to treat each other with respect and kindness. The skill I have in mind is to ask people in school to help me with handing out petitions for people to sign (also post other petitions online) to help have a low rate of gender-based violence. Second skill is to ask my community (I will ask them to help me write a letter which we can send to a local department the letter will be based on us requesting for “Healing classes” actually those classes is for people who cannot control themselves who let out their anger on someone’s body by hurting them physically),another skill in mind is that we should create more dates for a national shutdown day whereby the communities will gather together and have a peaceful protest (also not forgetting on those days they should be cops protecting the protest for people to feel safe),another skill is us as human beings treating one another with empathy, its very important because it does not raise to us getting hurt the more we treat one another with kindness the better we problem decreases ,another skill is there should be online classes for gender-based violence , it should have different sessions like (for example another session should be about learning about GBV, another one should be like ,how to /which steps to follow after facing GBV, another one , how to have an empathy heart to your community/friends/family etc.). With that I would love to close my mini paragraph.
